2.1	2.1	2.1

A minimum of 50% of the full-time faculty hold a graduate degree with a major in nursing; the remaining full-time faculty hold a minimum of a baccalaureate degree with a major in nursing.

Full- and part-time faculty include those individuals teaching and/or evaluating students in classroom, clinical, or laboratory settings.

Full-time nursing faculty hold educational qualifications and experience as required by the governing organization, the state, and the governing organization's accrediting agency, and are qualified to teach the assigned nursing courses.

A specific percentage of full-time faculty with a graduate degree in nursing or a baccalaureate degree with a major in nursing is no longer required.

All full-time faculty must meet the requirements of the governing organization, the state, and the governing organization's accrediting agency.

All full-time faculty must be qualified to teach all assigned nursing courses.

See the [faculty profile table](#) for required information and [instructions](#) for completing the faculty profile table.

See Glossary for definition – “Faculty” and “The State.”

2.2

Part-time faculty hold a minimum of a baccalaureate degree with a major in nursing.

2.2

Part-time nursing faculty hold educational qualifications and experience as required by the governing organization, the state, and the governing organization's accrediting agency, and are qualified to teach the assigned nursing courses.

2.2

A specific percentage of part-time faculty with a baccalaureate degree in nursing is no longer required.

All part-time faculty must meet the requirements of the governing organization, the state, and the governing organization's accrediting agency.

All part-time faculty must be qualified to teach all assigned nursing courses.

See the [faculty profile table](#) for required information and [instructions](#) for completing the faculty profile table.

See Glossary for definition – “Faculty” and “The State.”

2.3

Faculty (full- and part-time) credentials meet governing organization and state requirements.

2.3

Non-nurse faculty teaching nursing courses hold educational qualifications and experience as required by

2.3

The topic of non-nurse faculty was moved from Criterion 2.7 to now be a separate Criterion.

	<p>the governing organization, the state, and the governing organization's accrediting agency, and are qualified to teach the assigned nursing courses.</p>	<p>All non-nurse faculty must meet the requirements of the governing organization, the state, and the governing organization's accrediting agency.</p> <p>All non-nurse faculty must be qualified to teach all assigned nursing courses.</p> <p>See the faculty profile table for required information and instructions for completing the faculty profile table.</p> <p>See Glossary for definition – “Faculty” and “The State.”</p>

4.8

The length of time and the credit hours required for program completion are congruent with the attainment of the identified student learning outcomes and program outcomes and consistent with the policies of the governing organization, state and national standards, and best practices.

4.8

The total number of credit/quarter/clock hours required to complete the defined nursing program of study is congruent with the attainment of the end-of-program student learning outcomes and program outcomes, and is consistent with the policies of the governing organization, the state, and the governing organization's accrediting agency.

4.8

The total number of credit/quarter/clock hours required to complete the defined nursing program of study must be congruent with the attainment of the end-of-program student learning outcomes and program outcomes.

The total number of credit/quarter/clock hours required to complete the defined nursing program of study must be consistent with the policies of the governing organization, the state, and the governing organization's accrediting agency.

See Glossary for definition – “Nursing Program Length.”

4.9

Practice learning environments support the achievement of student learning outcomes and program outcomes.

4.10

Students participate in clinical experiences that are evidence-based and reflect contemporary practice and nationally established patient health and safety goals.

4.9

Student clinical experiences and practice learning environments are evidence-based; reflect contemporary practice and nationally established patient health and safety goals; and support the achievement of the end-of-program student learning outcomes.

4.9

Criterion 4.9 and Criterion 4.10 were combined.

All programs and program options must have direct hands-on, planned learning activities with patients that are sufficient and appropriate to achieve the end-of-program student learning outcomes, program outcomes, and/or role-specific professional competencies, and are overseen by qualified faculty who provide feedback to students in support of their learning.

The practice learning environments and the clinical experiences students receive in the practice learning environments must provide students with evidence-based contemporary practice experiences.

See Glossary for definition – “Clinical/Practicum Learning Experiences,” “Contemporary Nursing Practice,” “Evidence-Based,” “Practice Learning Environments,” “Practice Learning Experiences,” “End-of-Program Student Learning Outcomes,” “Program Outcomes” and “Professional Standards/Guidelines for Nursing Practice.”

completion and are sufficient to inform program decision-making for the maintenance and improvement of the student learning outcomes and the program outcomes.

6.3 Evaluation findings are shared with communities of interest.

6.4 The program demonstrates evidence of achievement in meeting the program outcomes.

6.4.1 Performance on licensure examination: The program's three-year mean for the licensure examination pass rate will be at or above the national mean for the same three-year period.

6.4.2 Program completion: Expected levels of achievement for program completion are determined by the faculty and reflects student demographics and program options.

6.4.3 Graduate program satisfaction: Qualitative and quantitative measures address graduates six to twelve months post-graduation.

6.4.4 Employer program satisfaction: Qualitative and quantitative measures address employer satisfaction with graduate preparation for entry-level positions six to twelve months post-graduation.

6.4.5 Job Placement rates: Expected levels of achievement are determined by the faculty and are addressed through quantified measures six to twelve months post-graduation.

*Newly established programs are required to have data from the time of the program's inception.

e. Analysis of assessment data to inform program decision-making for the maintenance and improvement of each end-of-program student learning outcome and each program outcome.

f. Documentation demonstrating the use of assessment data in program decision-making for the maintenance and improvement of each end-of-program student learning outcome and each program outcome.

*Programs seeking initial accreditation are required to have data from the time that the program achieves candidacy with the ACEN.

The SPE must contain the following:

- a. Specific, measurable expected levels of achievement for each end-of-program student learning outcome and each program outcome.
- b. Appropriate assessment method(s) for each end-of-program student learning outcome and each program outcome.
- c. Regular intervals for the assessment of each end-of-program student learning outcome and each program outcome.
- d. Sufficient data to inform program decision-making for the maintenance and improvement of each end-of-program student learning outcome and each program outcome*.
- e. Analysis of assessment data to inform program decision-making for the maintenance and improvement of each end-of-program student learning outcome and each program outcome.
- f. Documentation demonstrating the use of assessment data to inform program decision-making for the maintenance and improvement of each end-of-program student learning outcome and each program outcome

* Programs seeking initial accreditation are required to have data from the time that the program achieves candidacy with the ACEN.

6.1

The program demonstrates evidence of students' achievement of each end-of-program student learning outcome.

Each end-of-program student learning outcome must have a specific, measurable expected level of achievement.

There is ongoing assessment of the extent to which students attain each end-of-program student learning outcome.

There is analysis of assessment data and documentation that the analysis of assessment data is used in program decision-making for the maintenance and improvement of students' attainment of each end-of-program student learning outcome.

Each end-of-program student learning outcome must be assessed using appropriate assessment method(s).

The program faculty are expected to assess the extent to which graduates achieve each end-of-program student learning outcome.

All end-of-program student learning outcomes must be assessed at regular intervals. Every end-of-program student learning outcome does not have to be assessed every year. As an example, two (2) to three (3) end-of-program student learning outcomes may be assessed each year, with all end-of-program student learning outcomes assessed over three (3) to five (5) years.

There must be sufficient end-of-program student learning outcome data to inform the program faculty members' decision-making for the maintenance and improvement of each end-of-program student learning outcome.

The program faculty are expected to analyze the end-of-program student learning outcome data and use the analysis of data to make decisions for the maintenance and improvement of each end-of-program student learning outcome.

See Glossary for definition – “Outcomes” and “Sufficient.”

See ACEN Policy #29 Advertising and Recruitment of Students - http://www.acenursing.net/manuals/Policies_March2016.pdf.

See ACEN website for guidelines for publishing student outcome data - <http://www.acenursing.org/publishing-student-achievement-outcome-data/>.

The program demonstrates evidence of graduates' achievement on the licensure examination.

The program's most recent annual licensure examination pass rate will be at least 80% for **all** first-time test-takers during the same 12-month period.

There is ongoing assessment of the extent to which graduates succeed on the licensure examination.

There is analysis of assessment data and documentation that the analysis of assessment data is used in program decision-making for the maintenance and improvement of graduates' success on the licensure examination.

There is a minimum of the three (3) most recent years of available licensure examination pass rate data, and data are aggregated for the nursing program as a whole as well as disaggregated by program option, location, and date of program completion.

The three-year mean for the licensure examination pass rate was eliminated.

The program's most recent annual licensure examination pass rate for the program overall (aggregated for the program as a whole as reported by the NCSTB) must be at least 80% for **all** first-time test-takers during the same 12-month period.

Programs must include **all** first-time test takers in their licensure examination pass rate data. Programs may not eliminate any first-time test takers in their licensure examination pass rate data.

The 80% ELA benchmark is not a bright line rule. The licensure examination pass rate must be considered holistically. The holistic view should consider, but is not limited to factors such:

- Are the aggregated cohort annual licensure examination pass rates trending up, trending down, or remaining the same?
- If there are program options (e.g., pre-licensure program option and nurse aide-to-LPN program option), are the licensure examination pass rates for each option trending up, trending down, or remaining the same? Is a single program option impacting the aggregated data?
- If there are multiple locations the program is offered (e.g., main campus and an off-campus instructional site), are the licensure examination pass rates for each location trending up, trending down, or remaining the same? Is a single location impacting the aggregated data?
- Are faculty implementing appropriate data-driven changes based on the trend of the aggregated licensure examination pass rate data?
- As applicable, are faculty implementing appropriate data-driven changes based on the trend of the disaggregated licensure examination pass rate data (e.g., program option and/or location)?

- What is the status of the program with the state regulatory agency for nursing?

A decline in the annual licensure examination pass rate that places the nursing program below 80% must be reported to the ACEN per Policy #14 Reporting Substantive Changes.

States use different reporting timeframes such as October 1st to September 30th or January 1st to December 31st. The program must report the same licensure examination pass rate data for the same 12-month period used by its state.

The program must report a minimum of the three (3) most recent years of available licensure examination pass rate data aggregated for the program as a whole by date of completion.

The program must report a minimum of the three (3) most recent years of available licensure examination pass rate data disaggregated for each program option and by date of completion.

The program must report a minimum of the three (3) most recent years of available licensure examination pass rate data disaggregated for each location at which the nursing program is taught and by date of completion.

The ACEN may request that a program provide verification by an external source of its licensure examination data.

The program faculty are expected to continually assess the extent to which graduates succeed on the licensure examination.

The program faculty are expected to analyze the licensure examination pass rate data and use the analysis of data to make decisions for the maintenance and improvement of graduates' success on the licensure examination for the

		<p>program as a whole as well as for each program option and location. See Glossary for definition – “Pass Rates.” See ACEN Policy #29 Advertising and Recruitment of Students - http://www.acenursing.net/manuals/Policies_March2016.pdf.</p> <p>See ACEN website for guidelines for publishing student outcome data - http://www.acenursing.org/publishing-student-achievement-outcome-data/</p>
	<p>6.3</p> <p>The program demonstrates evidence of students' achievement in completing the nursing program. The expected level of achievement for program completion is determined by the faculty and reflects student demographics.</p> <p>There is ongoing assessment of the extent to which students complete the nursing program.</p> <p>There is analysis of assessment data and documentation that the analysis of assessment data is used in program decision-making for the maintenance and improvement of students' completion of the nursing program.</p> <p>There is a minimum of the three (3) most recent years of annual program completion data, and data are aggregated for the nursing program as a whole as well as disaggregated by program option, location, and date of program completion or entering cohort.</p>	<p>The program completion outcome must have a specific, measurable expected level of achievement (ELA).</p> <p>The definition used by the ACEN for the program completion rate is the number of students who complete each program option in no more than 150% of the stated program length for each program option beginning with enrollment in the first nursing course in each program option. For example, for a practical program, the program completion ELA may be “70% of the students who begin the first laboratory/clinical nursing course will graduate from the practical nursing program within 150% of the timeframe allotted for the program.”</p> <p>The program must provide a rationale for the specified ELA (e.g., 70% within three (3) years). The rationale must be appropriate for the program. In setting the ELA for the program completion rate, the program may consider reasons such as the historical completion rate for the program, the governing organization's completion rate for all students, state completion rate for similar programs, group of peer programs, ACEN data, etc. The ELA should be high enough as to be genuine and encourage continuous improvement but not so high as to be idealistic and, thus, unachievable. Peer</p>

evaluators will make a professional judgment regarding the appropriateness of the program's ELA.

The program's ELA is not a bright line rule. The achievement of the ELA must be considered holistically. The holistic view should consider, but is not limited to factors such:

- Are the aggregated cohort completion rates trending up, trending down, or remaining the same?
- If there are program options (e.g., pre-licensure program option and LPN-to-RN program option), are the aggregated cohort completion rates for each option trending up, trending down, or remaining the same? Is a single program option impacting the aggregated data?
- If there are multiple locations the program is offered (e.g., main campus and an off-campus instructional site), are the aggregated cohort completion rates for each location trending up, trending down, or remaining the same? Is a single location impacting the aggregated data?
- Are faculty implementing appropriate data-driven changes based on the trend of the aggregated cohort completion rate data?
- As applicable, are faculty implementing appropriate data-driven changes based on the trend of the aggregated cohort completion rates data (e.g., program option and/or location)?

A decline in the program completion rate that places the nursing program below its ELA must be reported to the ACEN per Policy #14 Reporting Substantive Changes.

The program completion outcome must be assessed using appropriate assessment method(s).

The program must report a minimum of the three (3) most recent years of annual program completion data aggregated for the program as a whole by date of completion.

		<p>The program must report a minimum of the three (3) most recent years of annual program completion data disaggregated by each program option and by date of completion.</p> <p>The program must report a minimum of the three (3) most recent years of annual program completion data disaggregated for each location at which the nursing program is taught and by date of completion.</p> <p>The ACEN may request that a program provide verification by an external source of its program completion data.</p> <p>The program faculty are expected to continually assess the extent to which graduates complete the program.</p> <p>The program faculty are expected to analyze the program completion data and use the analysis of data to make decisions for the maintenance and improvement of students' completion of the program as a whole as well as for each program option and location.</p> <p>See Glossary for definition – “Program Completion Rate.”</p> <p>See ACEN Policy #29 Advertising and Recruitment of Students - http://www.acenursing.net/manuals/Policies_March2016.pdf.</p> <p>See ACEN website for guidelines for publishing student outcome data - http://www.acenursing.org/publishing-student-achievement-outcome-data/</p>
	<p>6.4</p> <p>The program demonstrates evidence of graduates' achievement in job placement.</p>	<p>Note: The job placement outcome applies to all programs and all program options.</p>

The expected level of achievement for job placement is determined by the faculty and reflects program demographics.

There is ongoing assessment of the extent to which graduates are employed.

There is analysis of assessment data and documentation that the analysis of assessment data is used in program decision-making for the maintenance and improvement of graduates being employed.

There is a minimum of the three (3) most recent years of available job placement data, and data are aggregated for the nursing program as a whole.

The job placement outcome must have a specific, measurable expected level of achievement (ELA).

The ACEN definition of the job placement rate is the percentage of graduates employed in a position for which the program prepared them. For example, the ELA could be "90% of students will be employed within one (1) year of graduation."

The program must provide a rationale for the ELA (e.g., 90% within one year). The rationale must be appropriate for the program. In setting the ELA, the program may consider reasons such as the historical job placement rate for the program, the governing organization's job placement rate for students in other health science programs, state job placement rate for similar programs, group of peer programs, ACEN data, etc. The ELA should be high enough as to be genuine and encourage continuous improvement but not so high as to be idealistic and, thus, unachievable. Peer evaluators will make a professional judgment regarding the appropriateness of the program's ELA.

The program's ELA is not a bright line rule. The achievement of the ELA must be considered holistically. The holistic view should consider, but is not limited to factors such:

- Are the aggregated job placement rates trending up, trending down, or remaining the same?
- Are faculty implementing appropriate data-driven changes based on the trend of the aggregated cohort job placement data?

A decline in the program job placement rate that places the nursing program below its ELA must be reported to the ACEN per Policy #14 Reporting Substantive Changes.

The job placement outcome must be assessed using appropriate assessment method(s). For whatever methodology is used, the program must disclose the response rate. For example, if survey methodology

is used to assess job placement, the response rate is the number of surveys returned divided by the number of surveys distributed (number of graduates for that year). For example, 25% response rate = surveys sent to 100 graduates from 2014 and 25 surveys returned.

Some programs have low a job placement rate due to graduates continuing their education rather than seeking employment. In this case, the program is encouraged to have an additional outcome addressing transfer/academic progression.

The program's ELA is not a bright line rule. The achievement of the ELA must be considered holistically. The holistic view should consider, but is not limited to factors such:

- Are the aggregated transfer/academic progression rates trending up, trending down, or remaining the same?
- Are faculty implementing appropriate data-driven changes based on the trend of the aggregated cohort transfer/academic progression data?

A decline in the program transfer/academic progression rate that places the nursing program below its ELA must be reported to the ACEN per Policy #14 Reporting Substantive Changes.

If the program has a transfer/academic progression outcome, the program must provide a rationale for the transfer/academic progression rate ELA (e.g., 60% within one year). The rationale must be appropriate for the program. In setting the transfer/academic progression rate ELA, the program may consider reasons such as the historical transfer/academic progression rate for the program, the governing organization's transfer/academic progression rate for students in other health science programs, state transfer/academic progression rate for similar programs, group of peer programs, ACEN data, etc. The transfer/academic progression rate ELA should

be high enough as to be genuine and encourage continuous improvement but not so high as to be idealistic and, thus, unachievable. Peer evaluators will make a professional judgment regarding the appropriateness of the program's transfer/academic progression ELA.

The assessment of transfer/academic progression must be in addition to job placement. The program transfer/academic progression outcome must be assessed using appropriate assessment method(s). For whatever methodology is used, the program must disclose the response rate. For example, if survey methodology is used to assess transfer/academic progression, the response rate is the number of graduates for that year divided by the number of surveys returned. For example, 25% response rate = surveys sent to 100 graduates from 2014 and 25 surveys returned.

The program must report a minimum of the three (3) most recent years of annual job placement and transfer/academic progression data aggregated for the program as a whole and by date of completion.

The ACEN may request that a program provide verification by an external source of its job placement and transfer/academic progression data.

The program faculty are expected to continually assess the extent to which graduates are employed and/or transfer.

The program faculty are expected to analyze the job placement/transfer/academic progression data and use the analysis of data to make decisions for the maintenance and improvement of graduates' employment and/or academic progression.
